Deal

Q-Mind

Virtual Laboratory that optimizes tandem and QD solar cells

Maximum Efficiency Designs

$5,000/Year

Customers

Solar cell manufacturers and laboratories

Market

Q-Mind

Beachhead Market:

Tandem cell R&D laboratories

$10M

2027 - 2028

2k initial customers

Informatics Materials*

$390M

2030

Multi-material platform

Global PV Cell Market**

$1,491B

2034

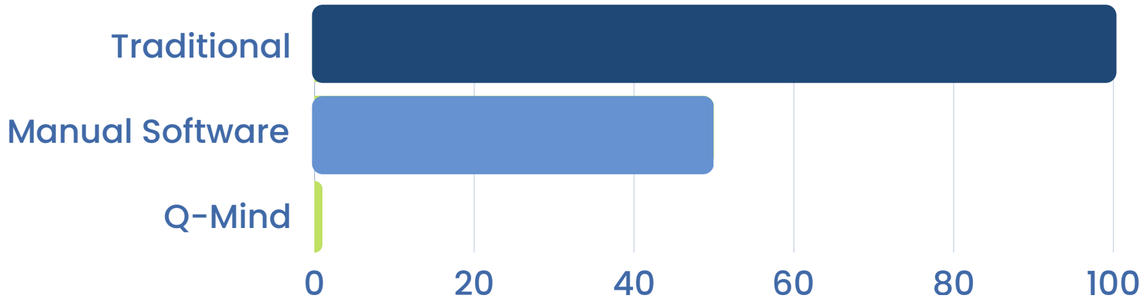

Certification according to ISO/IEC 17025 standard

*Grand View Research

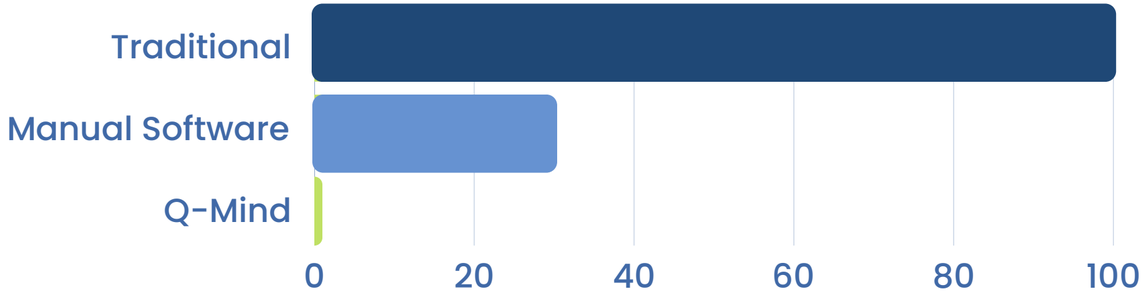

**Fortune Business Insights

Customer Value Proposition

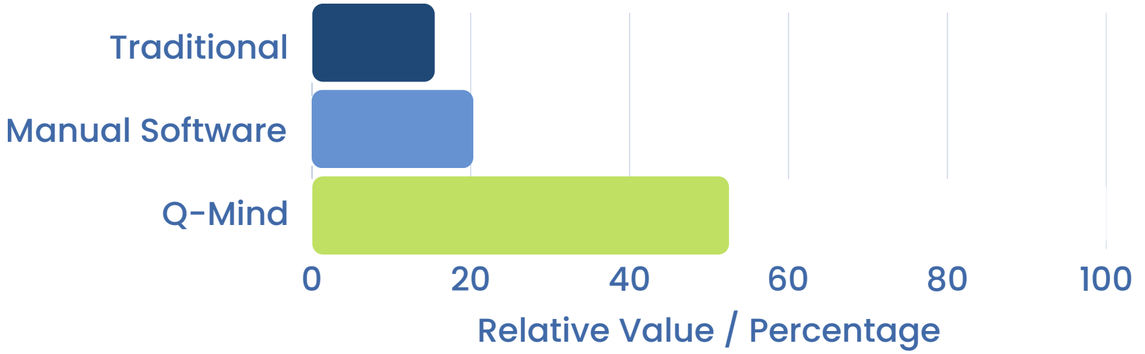

Q-Mind

Development Time

R&D costs

Theorical Efficiency %

Seconds, not years

R&D without physical investment

Zero toxic waste

Product

Multi-material physical optimization

AI

Top 10 designs, not just a single answer

Certification-ready report

20 Interviews

INMA INSTITUTO DE NANOCIENCIA Y MATERIALES DE ARAGÓN

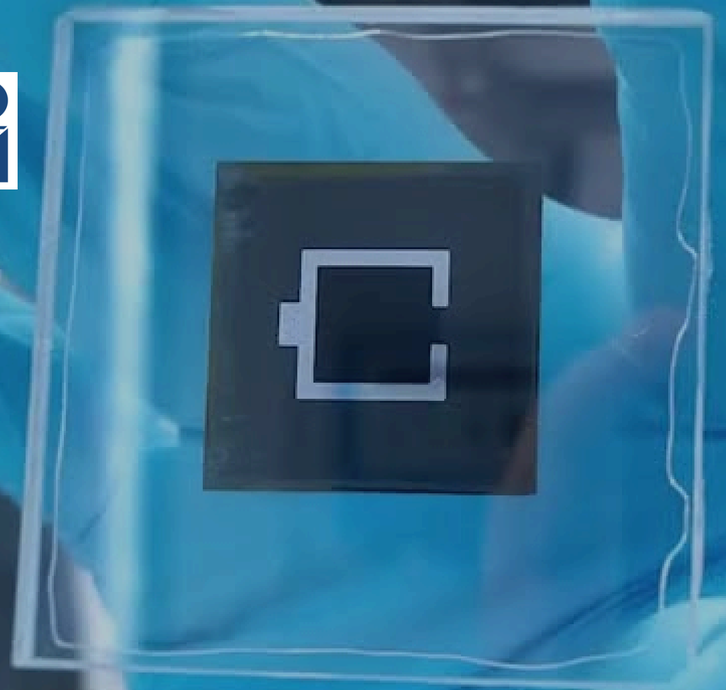

inam Institute of Advanced Materials UJI Castelló

Hanwha Q CELLS

HZB

National Laboratory of the Rockies

TANDEM PV

HYPHOTESIS

Tandem design → Slow, Costly, Polluting

Current → Difficult to optimize between subcells

R&D priority → Reduce candidates prior to manufacturing

APRENDIZAJE

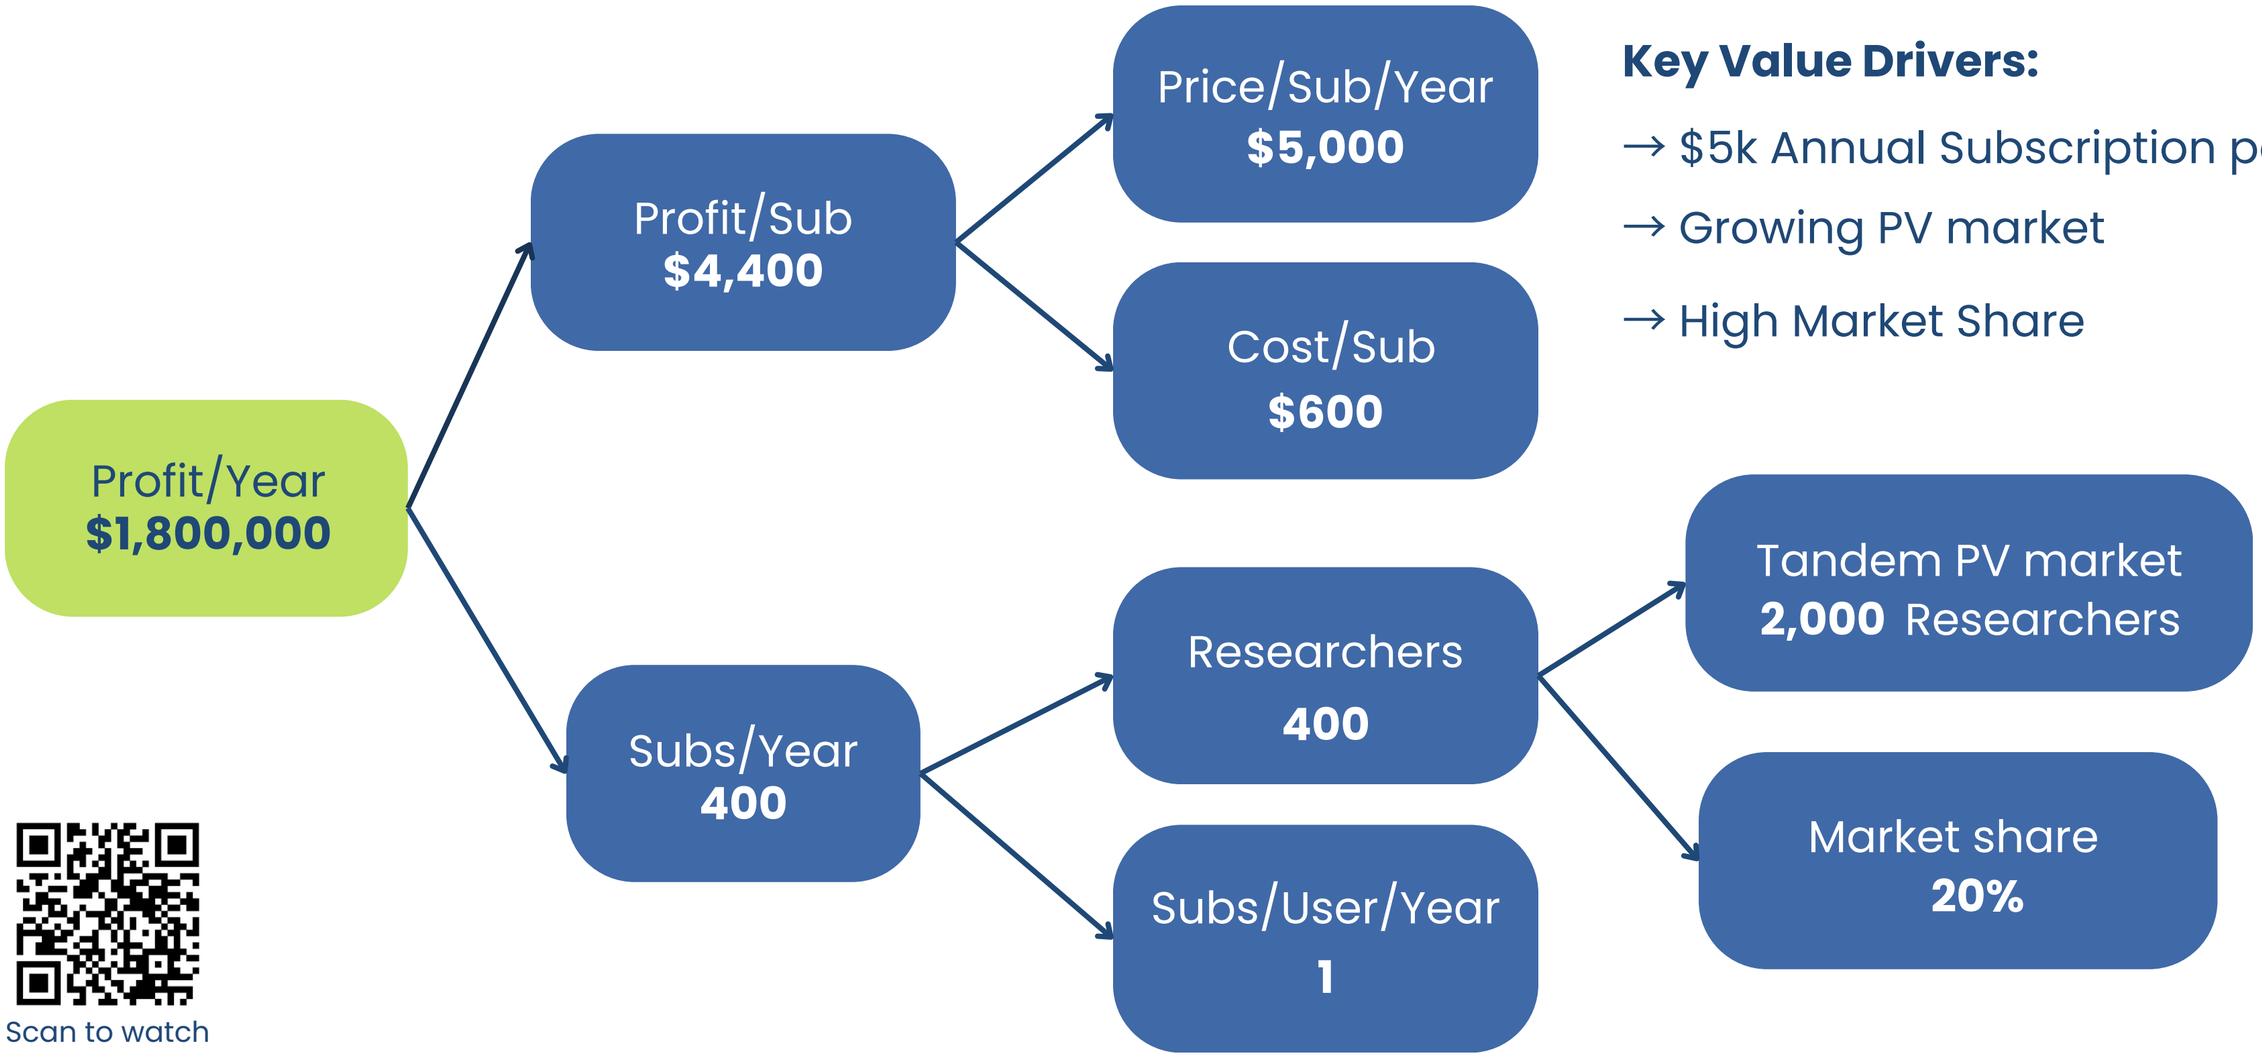

Design manufacturing by **trial and error**

Current Mismatch is a recurring problem

They use **free/homegrown** tools

Financials

Q-Mind

Key Value Drivers:

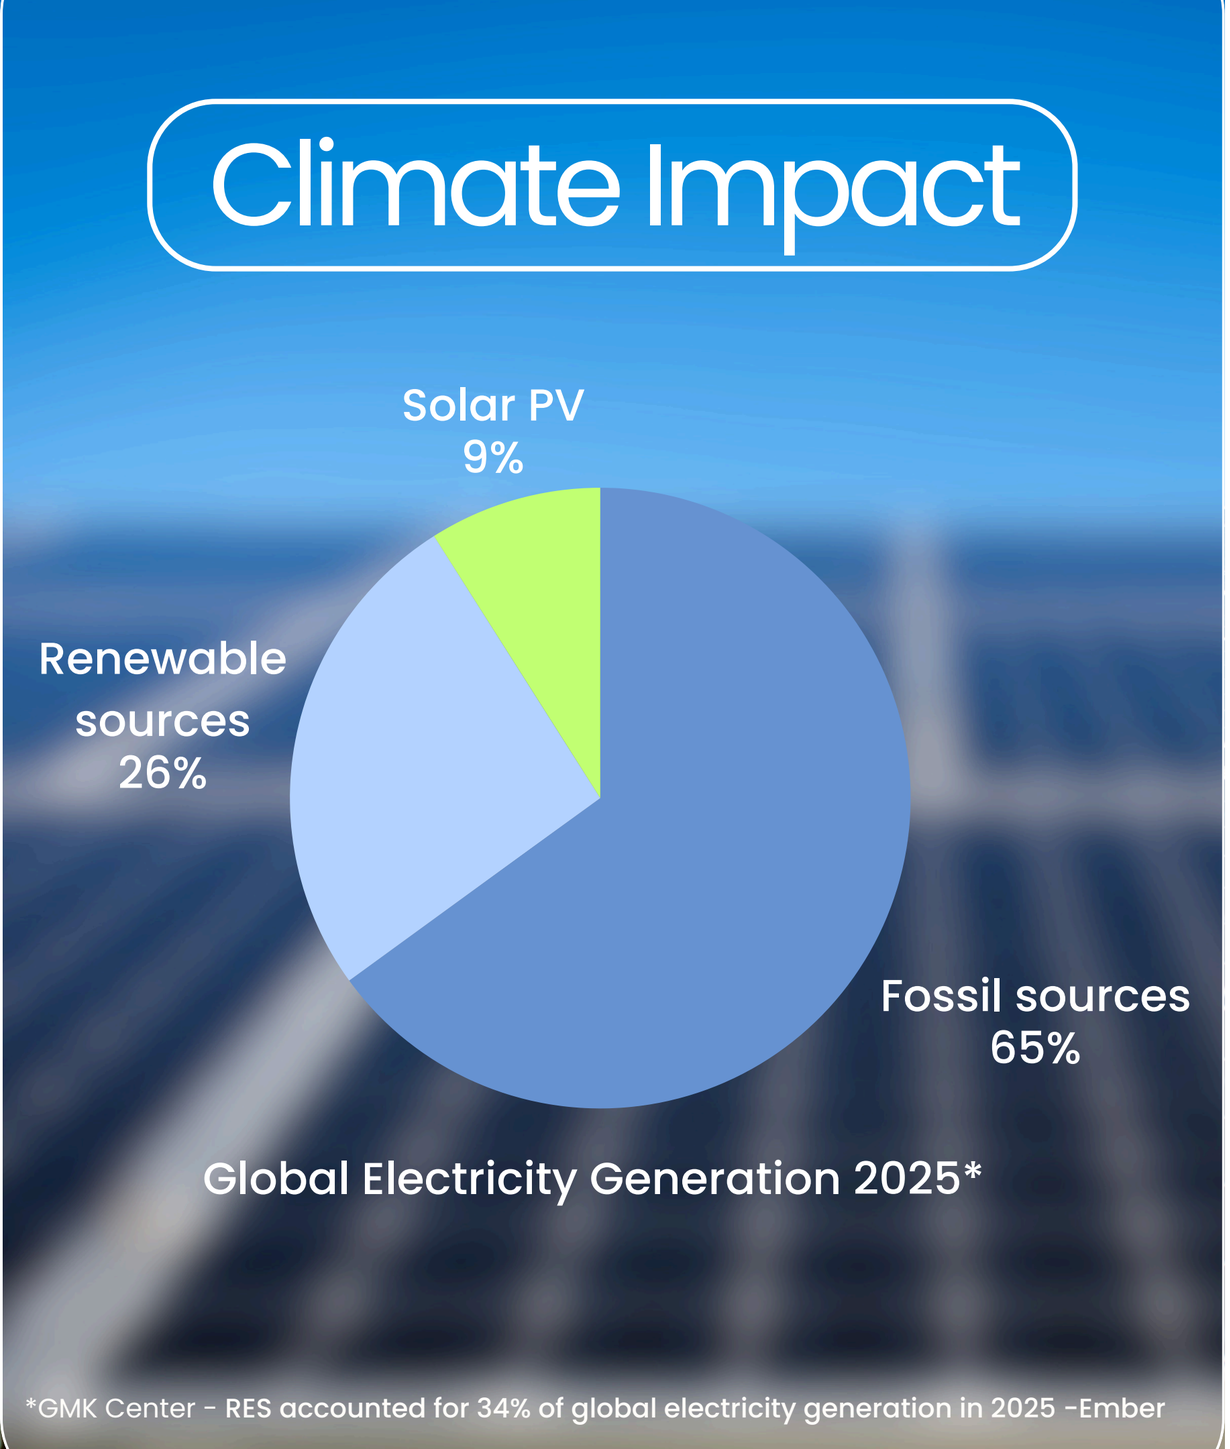

→ $5k Annual Subscription per user

→ Growing PV market

→ High Market Share

Climate Impact

*GMK Center - RES accounted for 34% of global electricity generation in 2025 -Ember

7 AFFORDABLE AND CLEAN ENERGY

>45% Efficiency

Accelerates the discovery of high-efficiency tandem cells

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Drives the future of RES

Replaces fuel burning

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

90% reduction of HAZWASTE

Replaces physical trial-and-error with a virtual laboratory

13 CLIMATE ACTION

~90,000 tCO2e avoided/year

Per 100 MW installed

Q-Mind

Our Dream

- Accessible SaaS covering ~50% of our beachhead market in 5 years
- Save up to 90% in time and resources for the discovery of more efficient PV cells
- Contribute to the viability of solar energy so that it eventually replaces the burning of fossil fuels
