Startup salvadoreña desarrollando tecnología basada en Machine Learning para agricultura sostenible

Agrismart

Visitanos en: agrismartsv.com

OUR DEAL

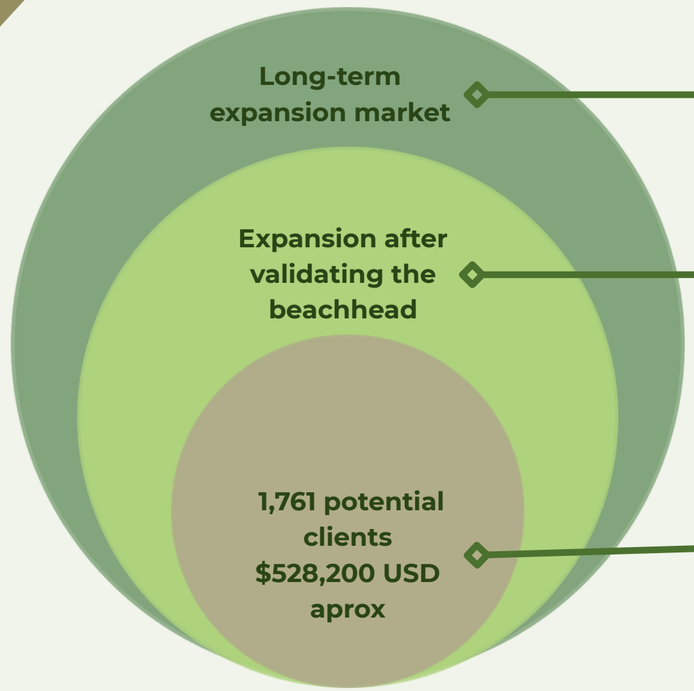

Agrismart

Smart crop monitoring system that helps farmers save water and improve productivity.

Starting at $300 per system

Greenhouses, nurseries and commercial farmers.

MARKET SEGMENTATION

Smallholder agriculture (Central America)

Smallholder horticulture (El Salvador)

Nurseries & greenhouses (El Salvador)

YEAR 3 — BEACHHEAD TARGET

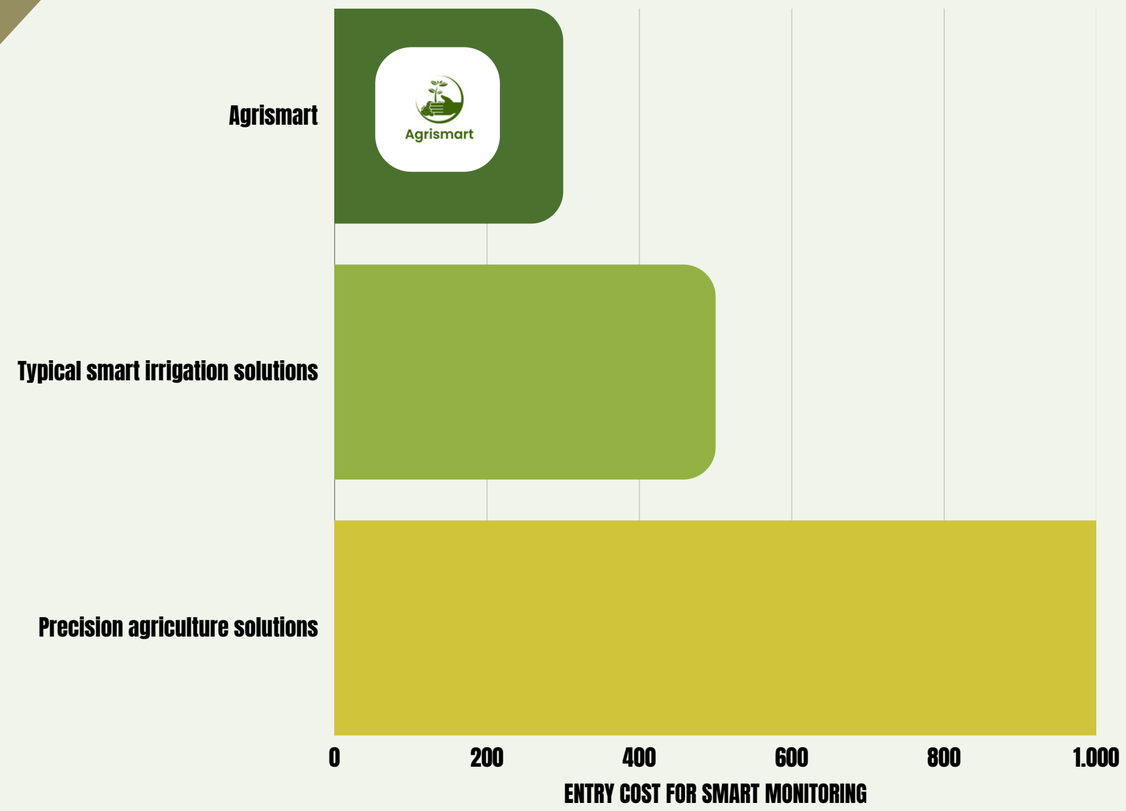

- 352 customers
- 20% penetration
- 3522 systems deployed

- Historical customer proxy; current market size to be validated.

Historical official proxy — IV Agricultural Census 2007 -2008 MAG

CUSTOMER VALUE PROPOSITION

Indicative market range; configuration and scope vary.

Value proposition : LOWER IRRIGATION COSTS
Better irrigation decisions without expensive precision-agriculture systems.

Aditional benefits:

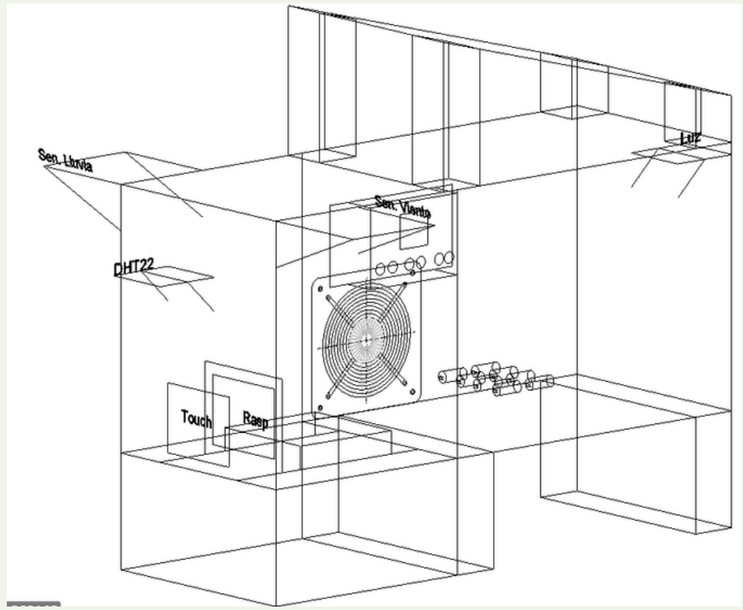

- Affordable starting at $300/system.
- Actionable combines environmental data in one dashboard.
- Modular can adapt sensors to different monitoring needs.
- Local data processing with synchronization when connectivity is available.

PRODUCT

Agrismart

A low-cost system that helps farmers monitor their crops and use water more efficiently.

Low-cost & modular

Local-first operation

From data to irrigation decisions

AGRISMART

CUSTOMER DISCOVERY

PEOPLE INTERVIEWED: 12

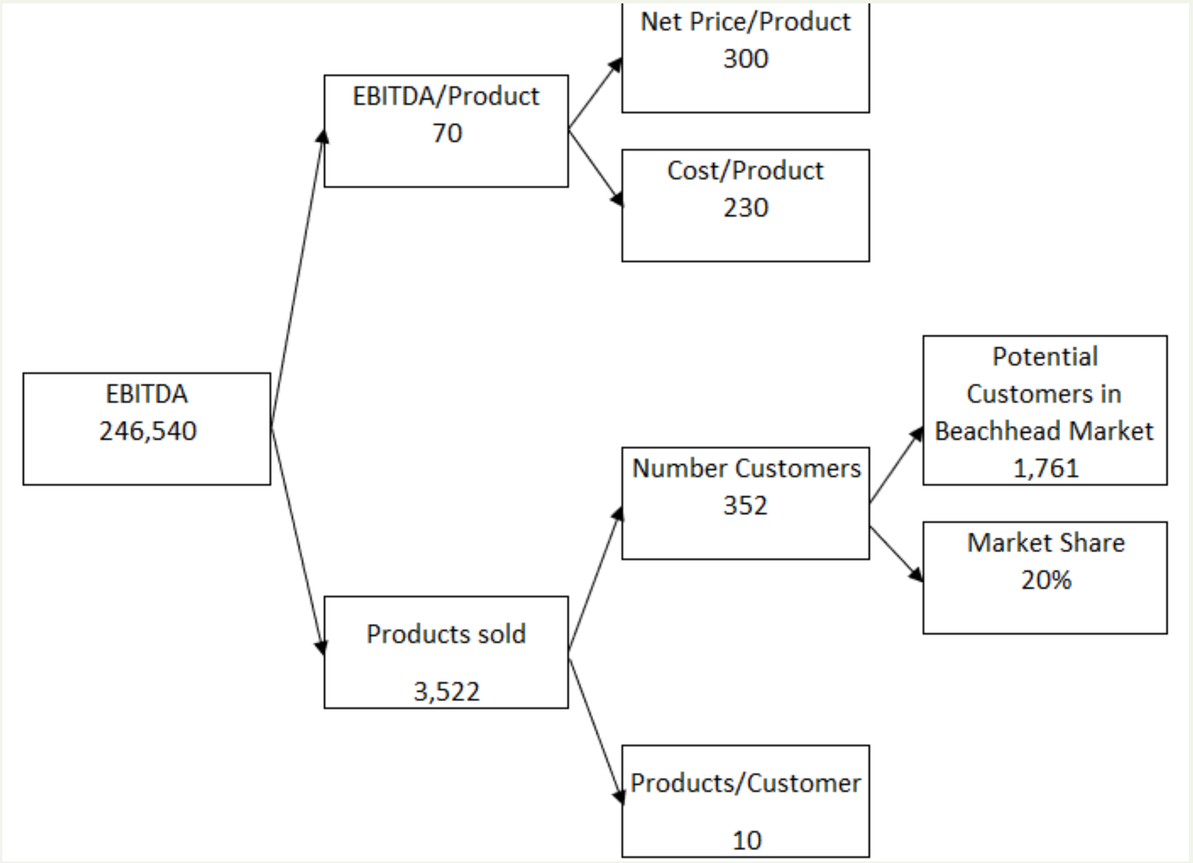

Assumptions tested:

- Everyone knows about tech solutions
- Having more control over their plants would make them feel safer.
- They can save a significant amount of water compared to what they're using right now.

Biggest learning:

- Most had never considered using technology to check on their plants.
- Many people who work in this field don't trust technology.
- We need to provide more guidance

FINANCIALS

KEY VALUE DRIVERS (KPI'S)

- **GROWTH** — 20% BEACHHEAD MARKET SHARE
- **EFFICIENCY** — $70 EBITDA PER PRODUCT
- **FINANCIAL** — $246.5K YEAR 3 EBITDA

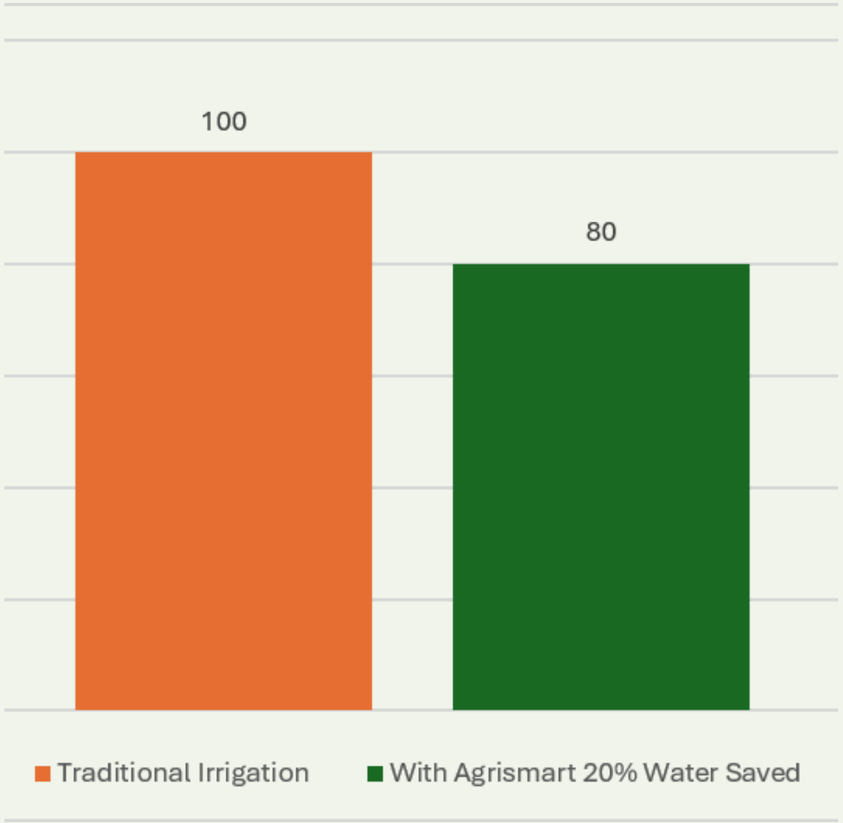

REVENUE: $1.06M

SUSTAINABLE GOALS:

CLIMATE IMPACT

ADAPTATION & RESILIENCE IMPACT

AGRISMART'S PROJECTED YEAR 3 IMPACT
128.6 MILLION LITERS OF WATER SAVED PER YEAR
of irrigation water saved annually
Target based on 20% water savings and 3,522 deployed systems.

IMPACT PER UNIT

1 farm-year = 36,500 L saved × 3,522 systems = 128.6M L saved

**AGRISMART RESEARCH PROJECT; AGRISMART TECHNICAL VALIDATION AND IMPACT PROJECTION.*

Our Dream

- We expect to have a functional and validated model by the end of 2026.
- Within five years, we will have helped more than 100 farmers protect their crops.
- Within five years, we will have achieved significant water savings in the country—at least 20% less than what was previously used.
