Year 3

TARGET MARKET

15 CUSTOMERS
Fashion & textile customers.

Our initial target segment

High-fit companies we can engage and serve first

Year 3

OUR GO TO MARKET FOCUS (SOM)

We will focus on a niche group og high-fit textile mils, manufacturers and sustainale fashion brands that have the ability and motivation to adopt natural-fiber yarn or fabric.
By Year 3, we aim to convert ~20% of our Beachhead Market into loyal, long term customers.

CUSTOMER
VALUE PROPOSITION

The fashion industry is shifting.
From fossil-based materials to natural, responsible solutions.

TODAY - FOSSIL BASED TEXTILES

- Made from non-renewable fossil resource.
- Microplastic pollution harmful to the planet (and our skin).
- Increasing regulations and consumer pressure.

THE INDUSTRY SHIFT

- Consumers demand sustainable transparent products.
- Brands commit to sustainability goals.
- Laws and buyers are driving change against fast fashion.

OUR SOLUTION: PINA&KARAW

- Upcycled agricultural waste into high-quality natural fibers.
- Natural, breathabl and comfortable.
- Renewable, biodegradable and better fot the plant.
- Competitive pricing for a sustainable future.

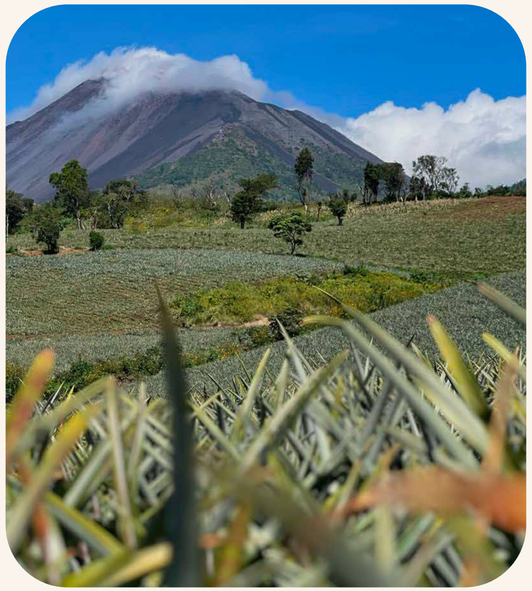

We help fashion brands make the shift to natural fibers without sacrificing quality, performance or competitiveness.

FABRIC
$7 per yard

THE PRODUCT

We transform agricultural waste into high-quality natural fiber textiles.

PINEAPPLE LEAVES
Agricultural waste from the field.

NATURAL FIBER
Extracted, cleaned and processed.

BLENDED YARN
20% Pineapple Fiber
80% Cotton

FABRIC
High-quality fabric ready for production.

YARN	FABRIC
OE NE16/NE20	Jersey 190/227 GSM

COSTUMER DISCOVERY

83 conversations across the global textile, fashion and sustainability acosystem

Company Owners - Designers - Mills & Manufactures - Sustainable-Fashion Advocates - Buyers - Industry Experts - Ngos & Investors

WHAT WE EXPECTED

- The market may be hesitant to adopt a new natural fiber.
- Price would be the biggest obstacle.
- Brands would resist paying more for sustainable material.
- Sustainability could remain a niche rather than a purchasing driver.

WHAT WE LEARNED

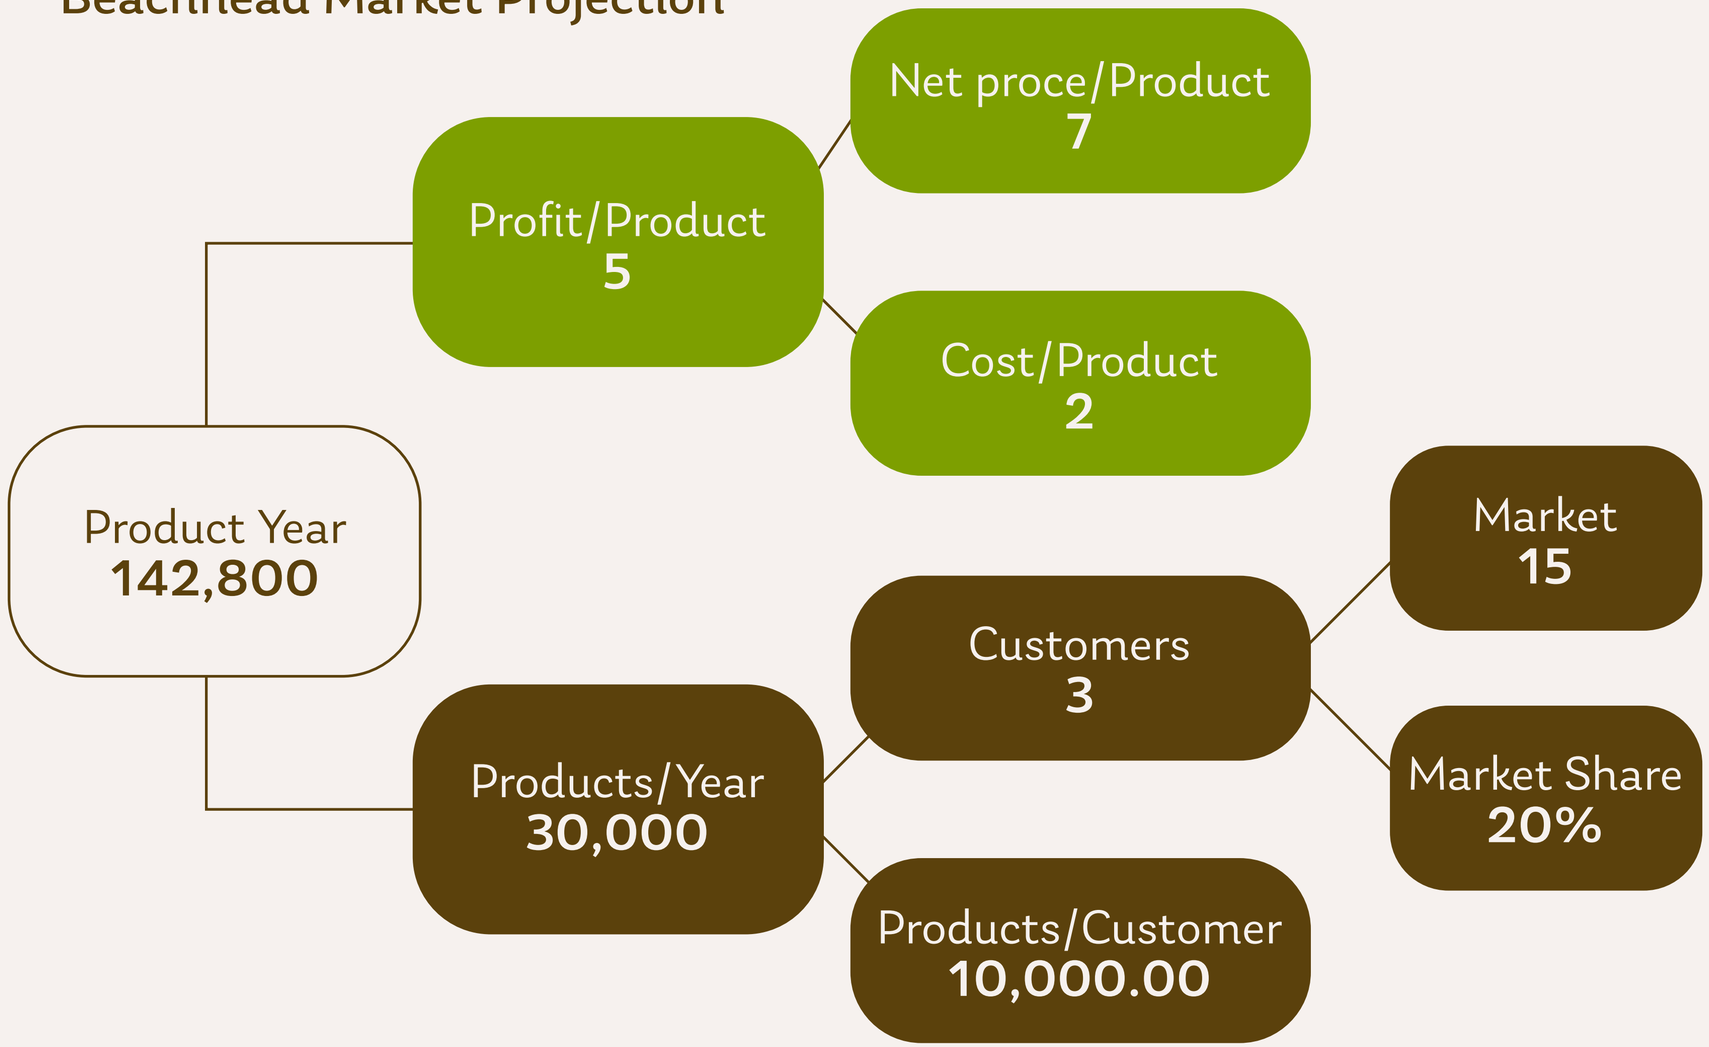

- There is real and growing interest in natural, traceable and lower-impact fibers.
- Price matters, but so do quality, performance, consistency, scalability and impact.
- Brands show willingness to pay a premium when the environmental and social value is credible.
- Regulation and market pressure-led by Europe and increasingly the U.S. - are accelerating demand for lower-impact materials.

83 conversations didn´t just validate the idea - they helpe us build a better product.
